

Mobile Media and “Google Generation” Significance and Challenges for Information Professionals

Heike vom Orde

**International Central Institute for Youth and Educational Television (IZI)
Munich, Germany**

Heike.Orde@br.de

The future is flat

- Mobile media access and “Google Generation”
- Mobile learning and “Google Generation”

And what about the library?

- Implications for information professionals
- Chances and challenges for libraries

"Google Generation": Owners of mobile phones 2012

By age and gender, percentages

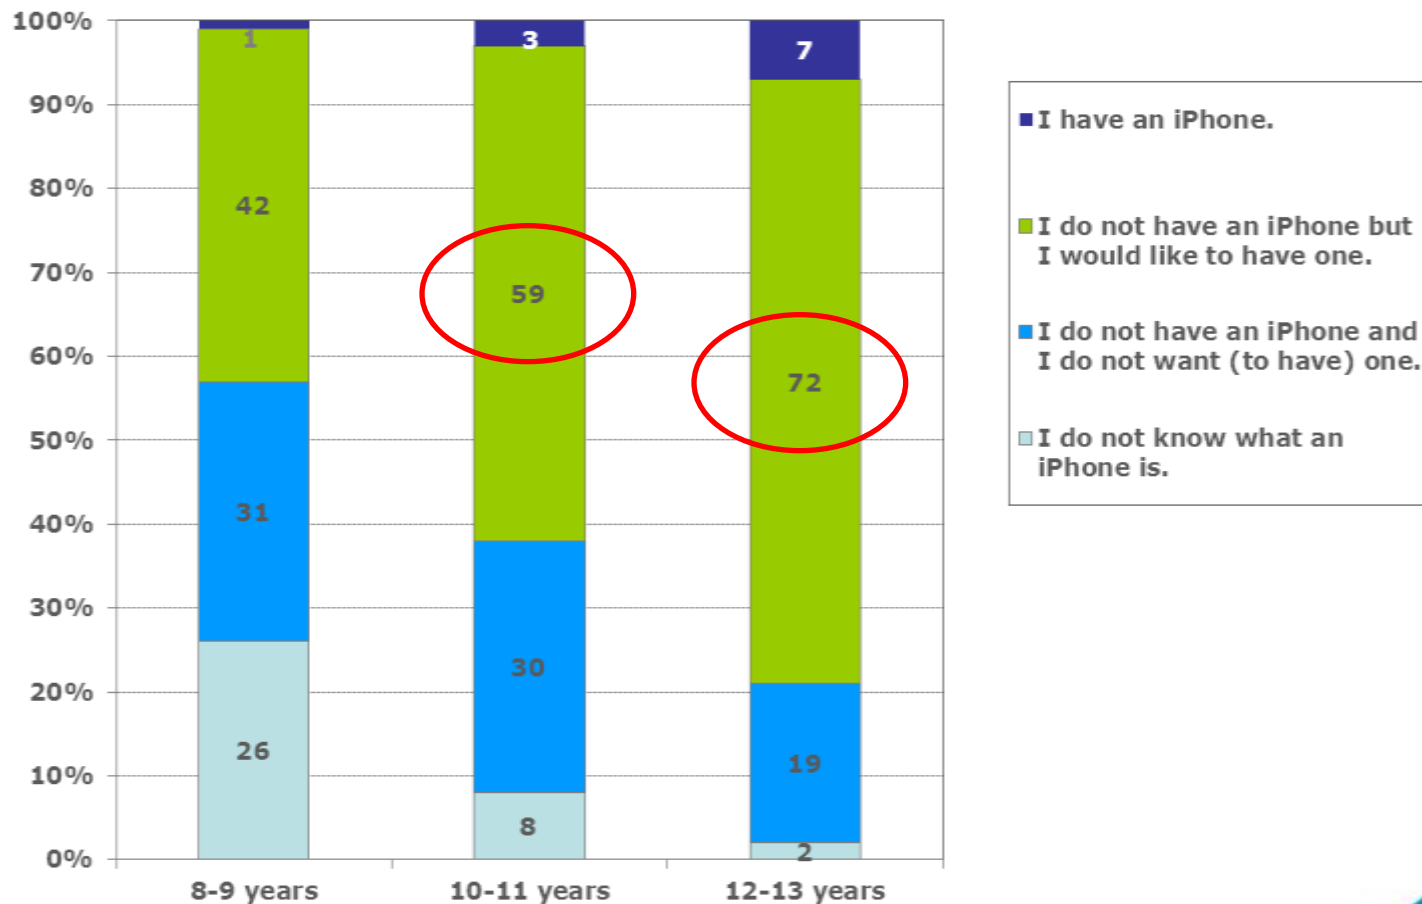

Basis: n=1.201, 12-19 years.

Source: JIM-Studie 2012, p. 52.

iPhone and children: Ownership and desire for ownership

By age, 2012, percentages

Basis: n=1.468, 6-19 years.

Source: Trend Tracking Kids 2012, p. 144.

Mobile Internet: Total population vs. 14- to 19-year-olds

By age, percentages

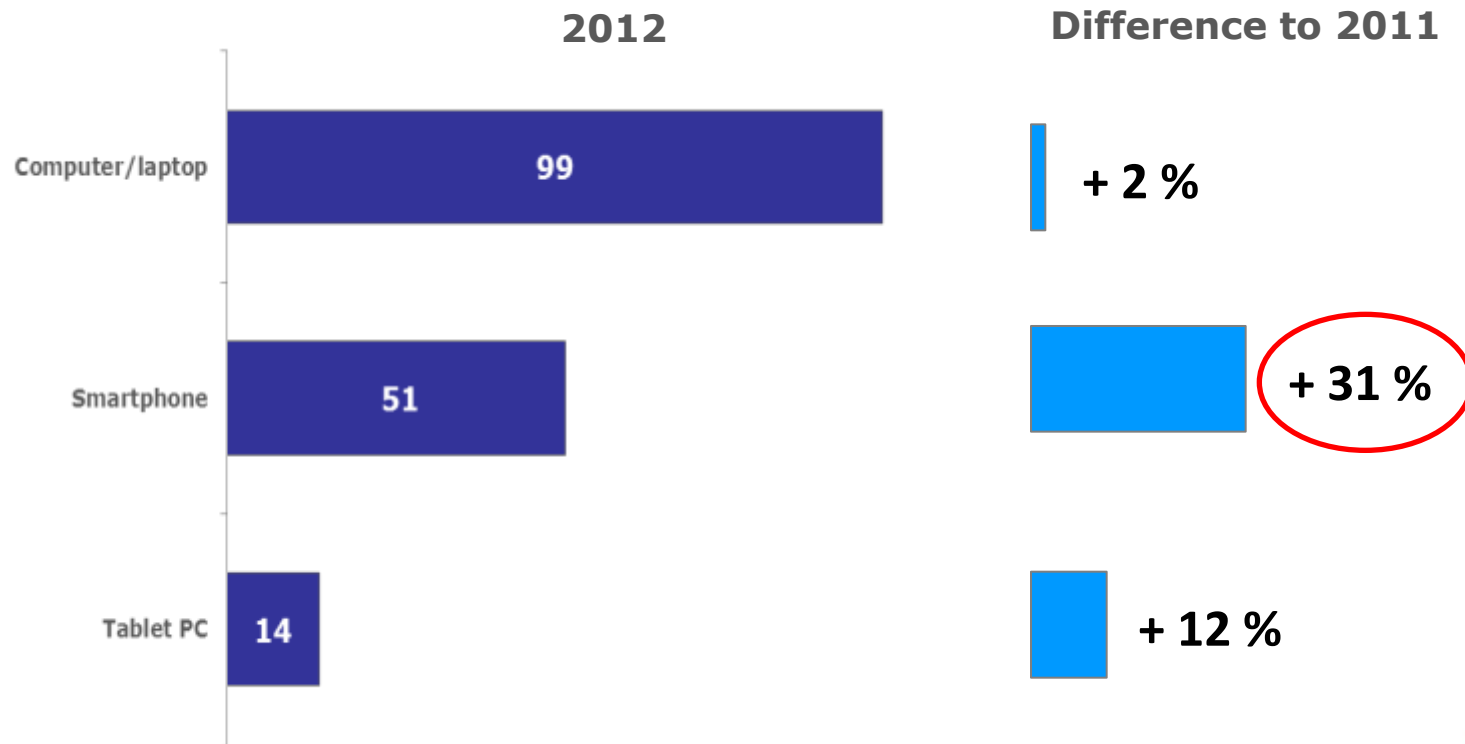

Basis: Internet users, 14 years and older.

Source: ARD/ZDF-Onlinestudien 2009-2012, in:
van Eimeren/Frees 2012, p. 368.

Mobile Internet use among 11- to 19-year-olds is growing fast

Going online using different devices, percentages

Basis: Trend Tracking Kids 2011: n=995 11- to 19-year-olds;
2012: n=965 11- to 19-year-olds.

Source: Trend Tracking Kids 2011 and 2012,
in: elements of art / iconkids & youth, p. 6.

Use of Mobile Media

Not only **internet access** is shifting

Mobiles also **turn into media**

Why smart phones will make facebook rich(er)

Mobile Monthly Active Users (Mobile MAUs)

Millions of Mobile MAUs

Please see Facebook's Form 10-Q for the quarter ended March 31, 2013 for definitions of user activity used to determine the number of our MAUs, DAUs and mobile MAUs. The number of MAUs, DAUs, and mobile MAUs do not include Instagram users unless such users would otherwise qualify as MAUs, DAUs, and mobile MAUs based on activity that is shared back to Facebook.

facebook

5

Most used apps of 11- to 19-year-olds

Which website is your **favourite website** and which **apps** do you currently use the most?

Percentages

Favourite websites

Apps (mostly used)

Basis: n=955 11- to 19-year-old Internet users;
n= 443 11- to 19-year-old app users.

Source: elements of art / iconkids & youth
2012, p. 7.

How many young people download apps?

Have you ever downloaded apps for your mobile phone/iPod touch/iPad?

By age, percentages

Basis: 2011: n=1.502; 2012: n=1.468,
6-19 years.

Source: Trend Tracking Kinds 2012, p. 149.

Comparison of internet use on PC and smartphone: "slow food" vs. "fast food"

Desktop computer/stationary internet = "slow food"

- Low frequency of use
- Longer sequences of use
- Use of complex / extensive contents / functions
- High emotional involvement

Smartphone / mobile internet = "fast food"

- Higher frequency of use
- Shorter sequences of use
- Focused use
- Low emotional involvement

Mobile learning and “Google Generation”

Mobile learning =
individualized learning experience,
accessible **anytime** and **anywhere**

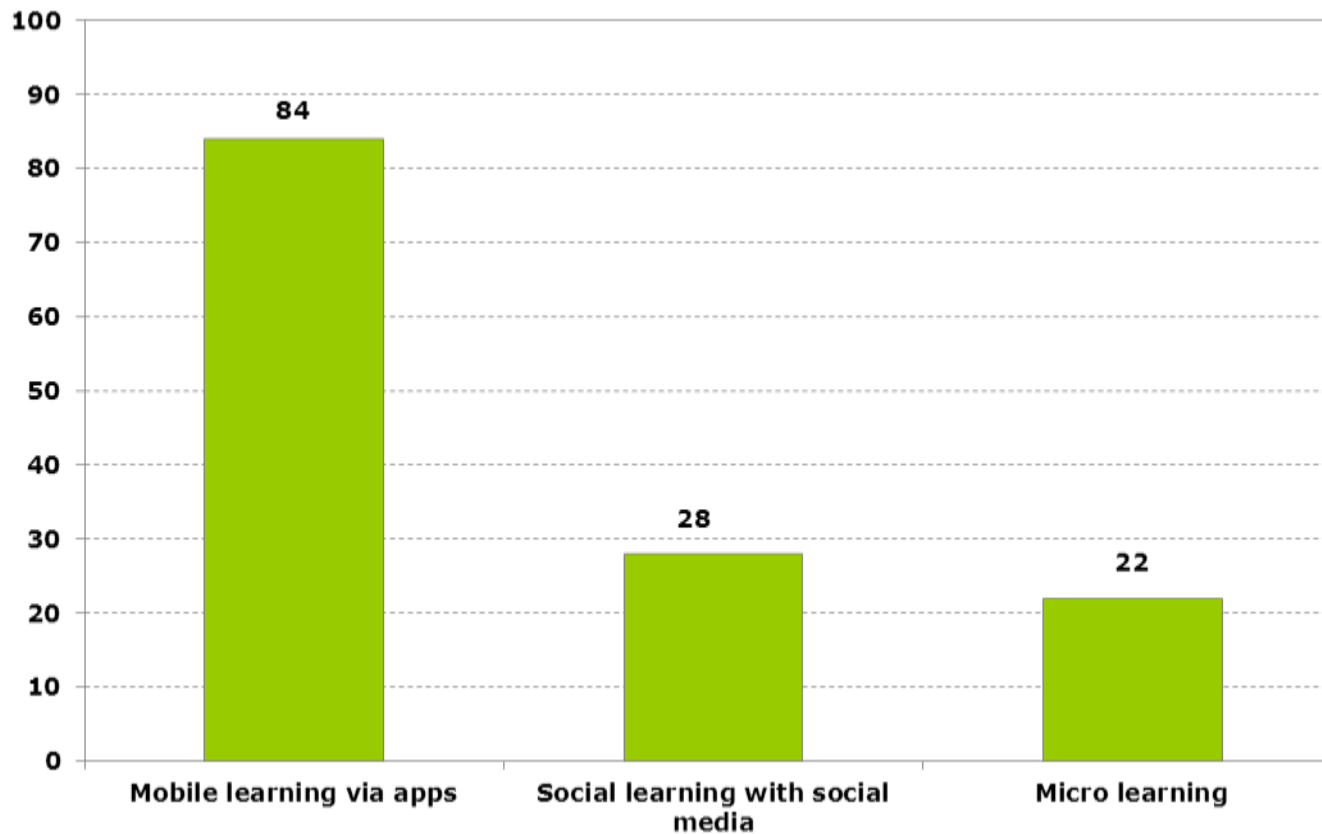

Mobile media offer a **didactic advantage:**
Tablets and smart phones **close the gap** between
formal and informal learning environments

They facilitate **self-directed and self-organized learning:**
alone or in groups, at home, at school or in the library.

Learning with apps: The e-learning trend

“Which types of e-learning will gain importance in the next three years?”

Experts survey, percentages

Basis: n=64.

Source: MMB Learning Delphi 2012.

And what about the library?

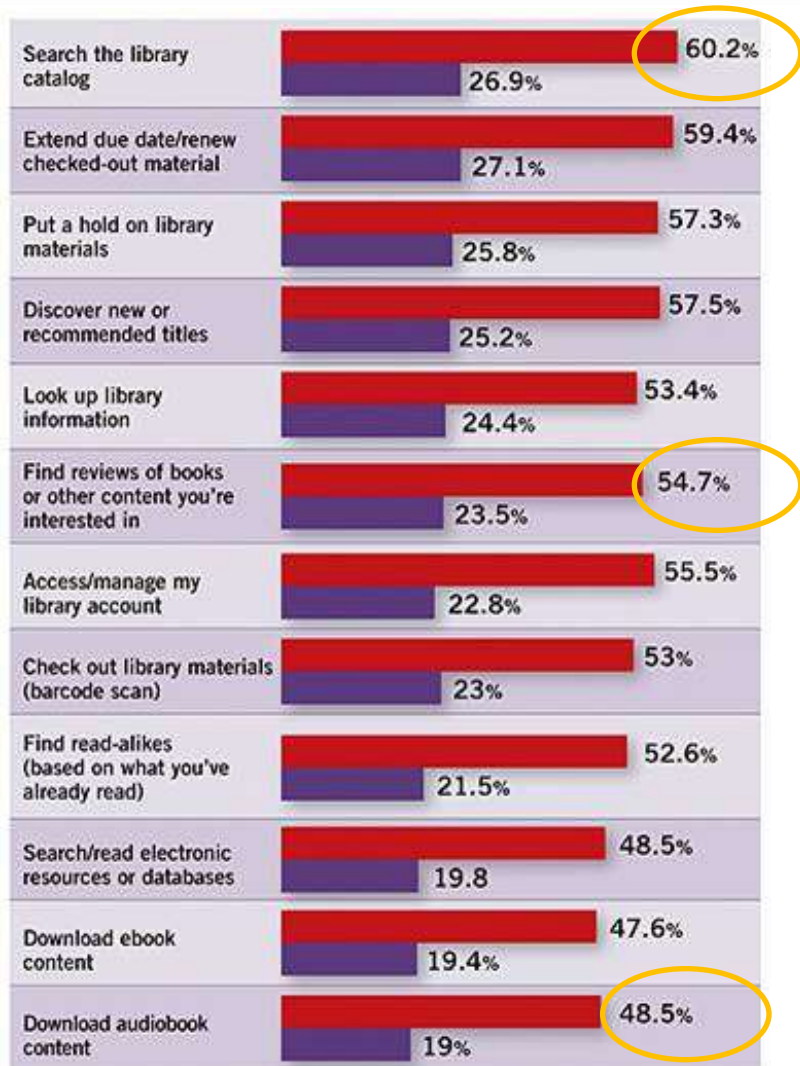

Libraries wanting to be recognized and taken seriously as partners **in lifelong learning** must **acknowledge** this potential and **integrate the benefits** of mobile media devices in their daily work.

Mobile media are not only **much appreciated devices** for “Google Generation” but do also offer **huge learning potential**.

Libraries have to integrate their services within **young users' media routines**. Thus they can **attract** “Google Generation “ and **connect** with it anywhere and anytime.

Just ask your clients ...

“What services do you want most from your library apps?”

■ Have app-capable smartphone or tablet ■ Do not have a device for mobile apps

Mobile instruction

This includes the application of mobile devices for library instruction. Can be text-based, audio or video. For audio-based instruction, see also the section on Podcasting [🔗](#)

- [Open University Library, United Kingdom](#) [🔗](#) text-based instruction
- [Washington State University Libraries](#) [🔗](#) "How To ..." - Help with Library Resources and Tools: instructional podcasts

Mobile tours of the library

Audiotours can be either downloaded on users' own mobile devices, or mobile devices with audiotours on them can be lend by the library. Audiotours can be made available in various languages.

- [Bostock Library Walking Audio Tour](#) [🔗](#) [Duke University Libraries](#) offer MP3 files to download on your own MP3 player
- [C.V. Starr East Asian Library](#) [🔗](#) at [Columbia University](#) offer MP3 tours in English, Chinese, Japanese, Korean and Tibetan.
- [London School of Economics, United Kingdom](#) [🔗](#) tour podcast can be downloaded or you can borrow a tour handset from the Welcome Point.
- [Oxford Brookes University Library, United Kingdom](#) [🔗](#) tour can be downloaded or you can borrow an MP3 player at the Enquiry Desk.
- [Tartu Public Library, Estonia](#) [🔗](#) provided an audiotour of one of their exhibitions (Spring 2008). The audiotour was put on MP3 sticks. These were entered in the catalogue, so that users could borrow the MP3 sticks
- [University of Limerick](#) [🔗](#) provide MP3 audio tours to download to own device or borrow an MP3 played from the library.
- [University of Otago Library, New Zealand](#) [🔗](#), in English, Mandarin and Maori.

QR (Quick Response) 2D Codes

For a more detailed page about 2D codes, also known as QR codes, see the page in this wiki for [QR Codes](#). See also the [description in Wikipedia](#) [🔗](#) and the [explanation in CSI on YouTube](#) [🔗](#). Users with a camera phone equipped with the correct reader software can scan the image of the QR 2D Code causing the phone's browser to launch and redirect to the programmed URL.

- [University of Bath Library, United Kingdom](#) is doing a project including QR2D codes in their OPAC. Catalogue records are provided with these codes. When scanning the code, a map of the library is launched on user's mobiles, helping them to locate the library material in the library building. The university uses QR in their teaching and learning and even [blogs](#) [🔗](#) on their QR code service.
- [Biblioteca Rector Gabriel Ferraté, Universitat Politècnica de Catalunya \(BRGF\)](#) [🔗](#) uses [QR Codes](#) [🔗](#) to provide additional information on promotional posters and on the web pages, to provide username and password to users who subscribe to the [CLIC Area service](#) [🔗](#) (a computer classroom), to generate reminders of reservations of the group study rooms library, to fill the suggestion forms or to enrich the contents of the library's jazz collection. Take a look at <http://www.youtube.com/watch?v=OQ3kD0F2u0A> [🔗](#) to know more about one of the QR applications at the BRGF.

Mobile learning: Learning centre library

“App Gap”

has developed among
children in disadvantaged
families

(Source: Zero to Eight,
Children’s Media Use in
America, 2011)

Mobile Media Access, by Income

Among children ages 0-8, percent with mobile media devices in their household:

Downloading Apps, by Income

Among children ages 0-8, percent whose parents have downloaded any apps for their children to use:

Using New Mobile Media, by Income

Among children ages 0-8, percent who have ever used a cell phone, iPod, iPad, or similar device for playing games, watching videos, or using apps:

Mobile Media: Our mission – our benefits

Our mission:

We should not only **provide access** to mobiles and apps but also

support the educational use of mobile media to socially disadvantaged library users.

Our benefits:

Mobile media services and activities strengthen the libraries' role as **learning centres and partners in the lifelong learning** process

and

might be the key **to stay relevant in a mobile digital world.**
